Supplementary Information for Legislative Review

2006-2007 Revenue Estimates

Manitoba

PREFACE

This document has been produced by the Department of Finance and is intended to complement information provided in the 2006/07 Estimates of Revenue. This includes a description of the revenue source or, where applicable, a further breakdown of the source into more specific components. It is hoped this additional information will assist members of the Legislature in their review of the revenue estimates.

A Summary by Department provides information on all revenues estimated to be collected by each department for 2006/07 with comparative estimates of revenue for 2005/06. In order to make year-over-year comparisons meaningful, adjustments have been made to the 2005/06 estimates figures to reflect the restatement for inventory accounting as a result of amendments to Generally Accepted Accounting Principles (GAAP).

The contents of this supplement are organized in the same manner as the 2006/07 Estimates of Revenue in order to allow for ease of use. Revenues are grouped into three main sources: Taxation, Other Revenue, and Government of Canada.

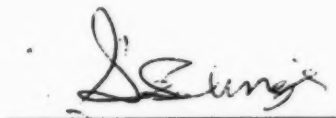
Taxation revenues are reflected, as in the Estimates of Revenue, under the department responsible for collection. Descriptive information for taxation revenues includes the base upon which the tax is assessed and the formula for determining the amount owing.

Other Revenue encompasses all the fees and charges levied by departments as a part of their program delivery. This includes recovery of costs for goods or services provided to Crown corporations and other government agencies. Recoveries from other government departments are credited back to expenditure appropriations as a part of the Estimates of Expenditure. Other Revenue also includes funds transferred from Crown corporations, revenue sharing payments from special operating agencies and proceeds from the sale of government owned assets.

Wherever applicable, the main fees or ranges of individual fees are provided in these documents or references on where to obtain the actual schedules are provided.

Government of Canada revenues are identified by major program including: Equalization, Canada Health Transfer (CHT), Canada Social Transfer (CST), Child Care, and Health Funds. The final grouping of Other includes all Canada/Manitoba agreements to fund specific programs. The supplement provides a brief description of the basis of cost sharing for each program.

Additional information on all revenue sources is available from the collecting department or agency.



Honourable Greg Selinger
Minister of Finance
